Description

An ebony model of a Ship's Cannon on a later carriage.

The cannon barrel has a four stage taper with a touch hole. The naval carriage was recently made for display and it is likely that the cannon barrel was originally simply as a model without carriage.

The carriage is ebonized pine has been well made with metal fittings and a fixed wedge to show how the barrel would have been elevated. Mid 19th Century.

A second, similar model with a longer barrel, is also available on this website.
